Abstract

MarkMe is a smart event management platform that helps our college organize and track events efficiently. It allows students to follow spaces, register for events with custom questions, and check in using unique codes. Events move through clear stages like Upcoming, Live, and Archived, making them easy to manage. Organizers can track attendance, send notifications, and collect feedback, while students can view their event history and followed spaces. MarkMe ensures a smooth and interactive event experience for both organizers and participants.

Use Case Diagram

ER Diagram

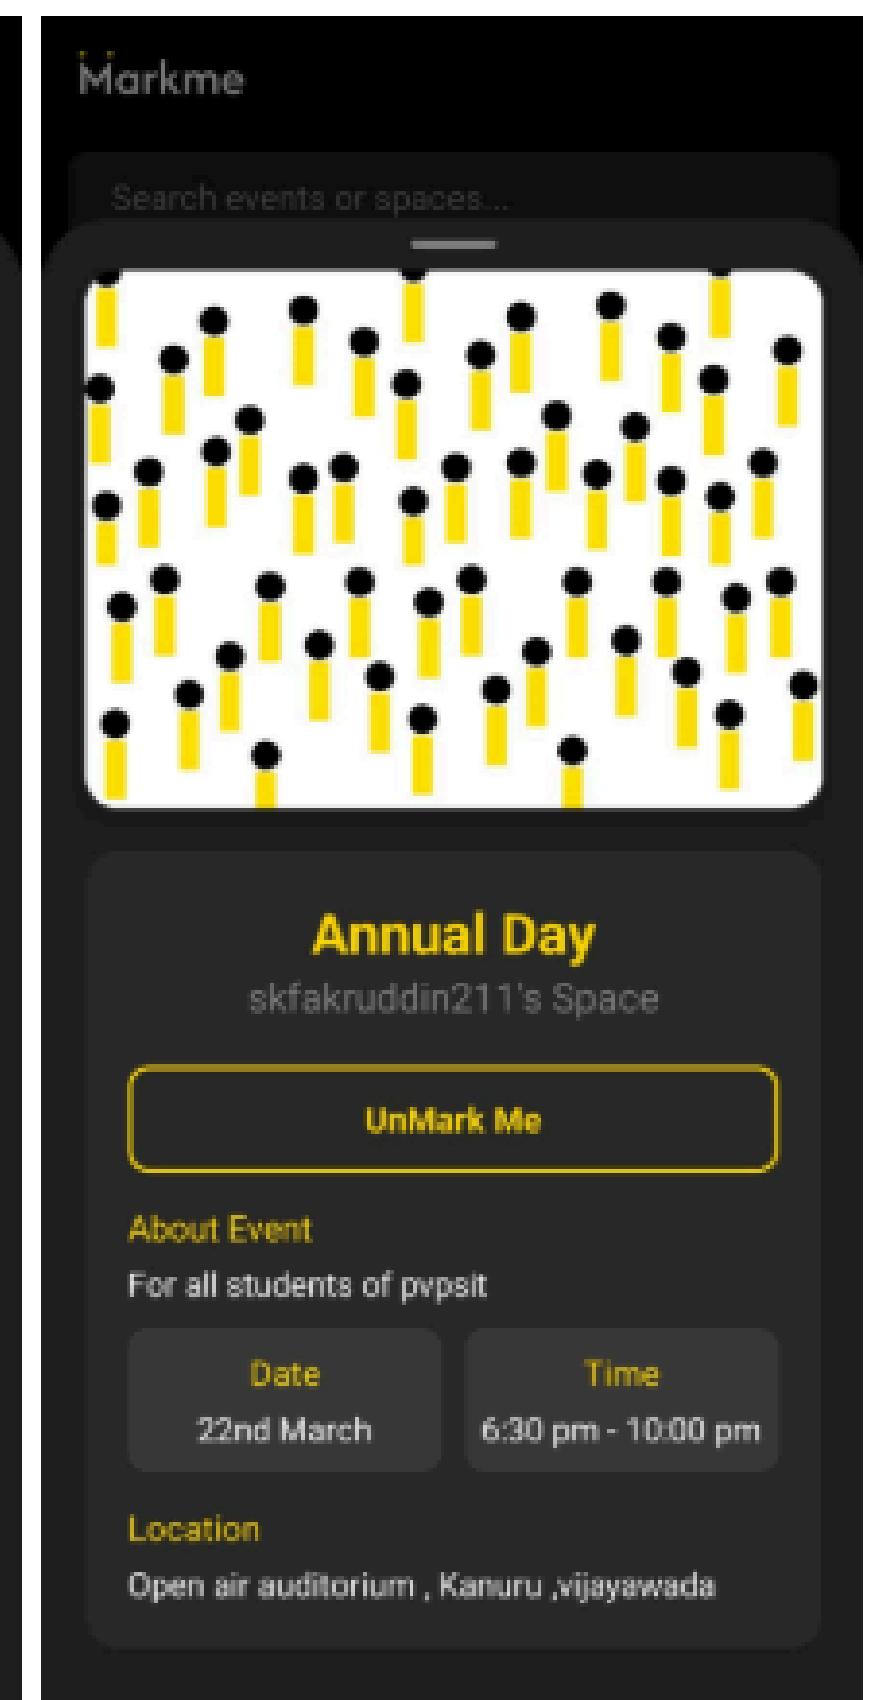

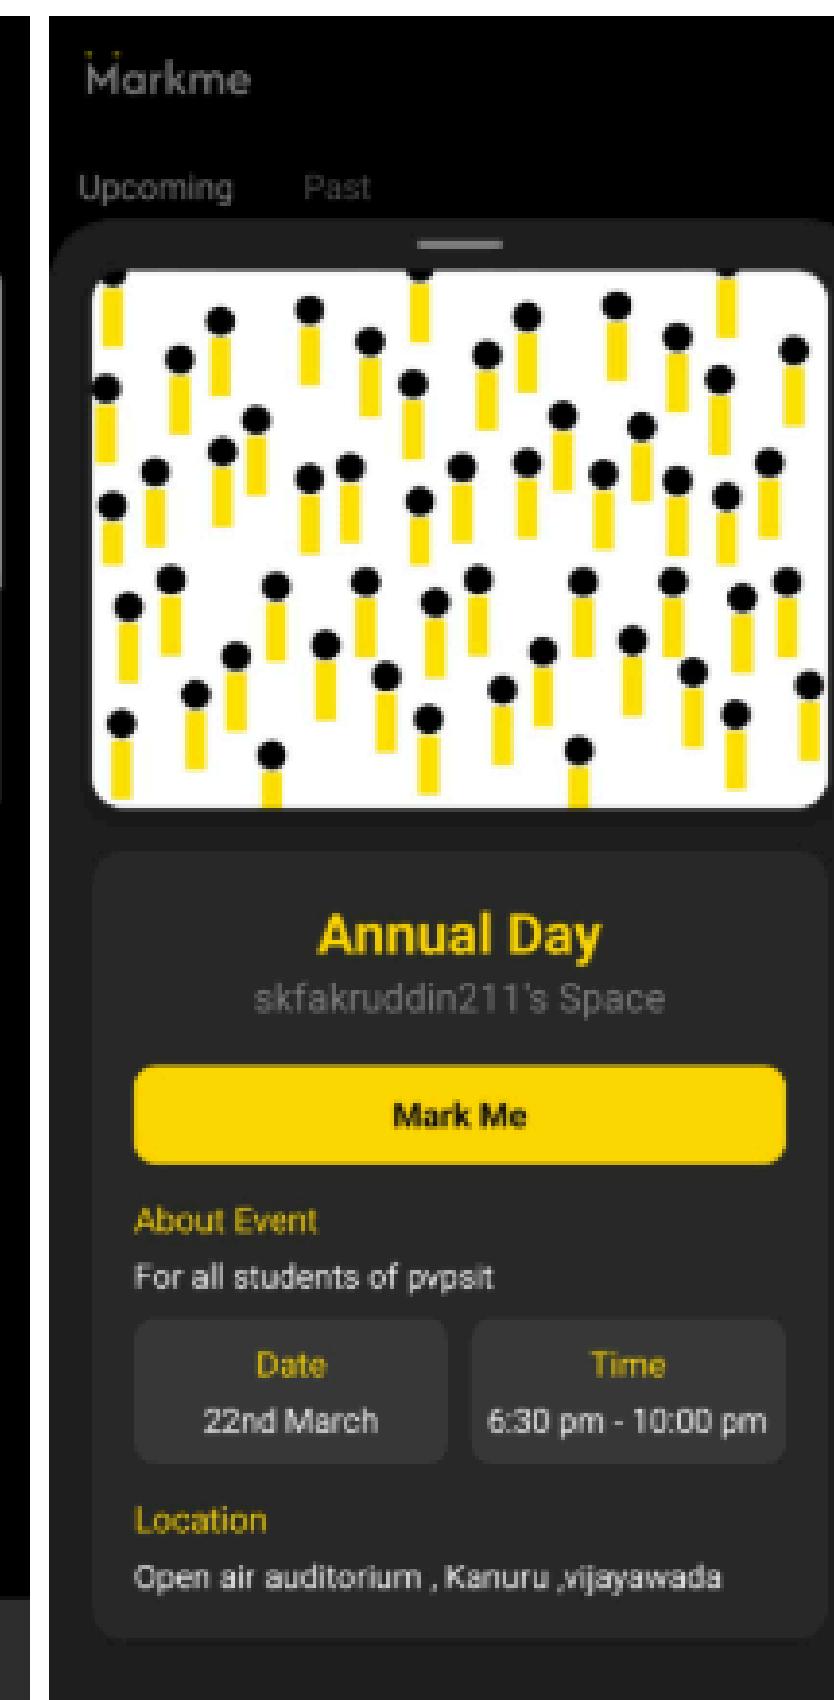

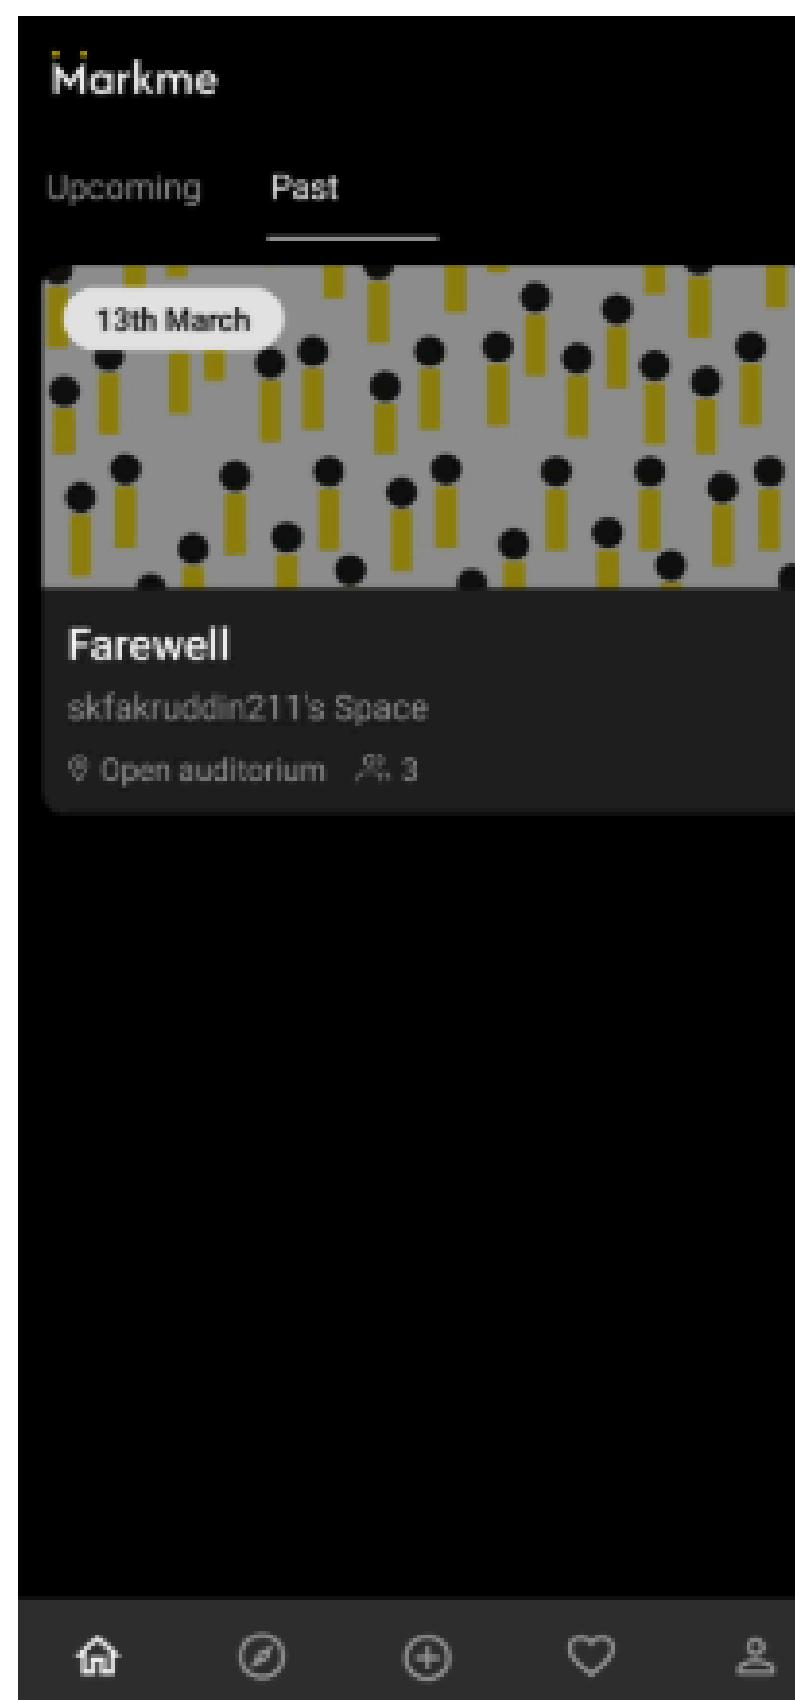

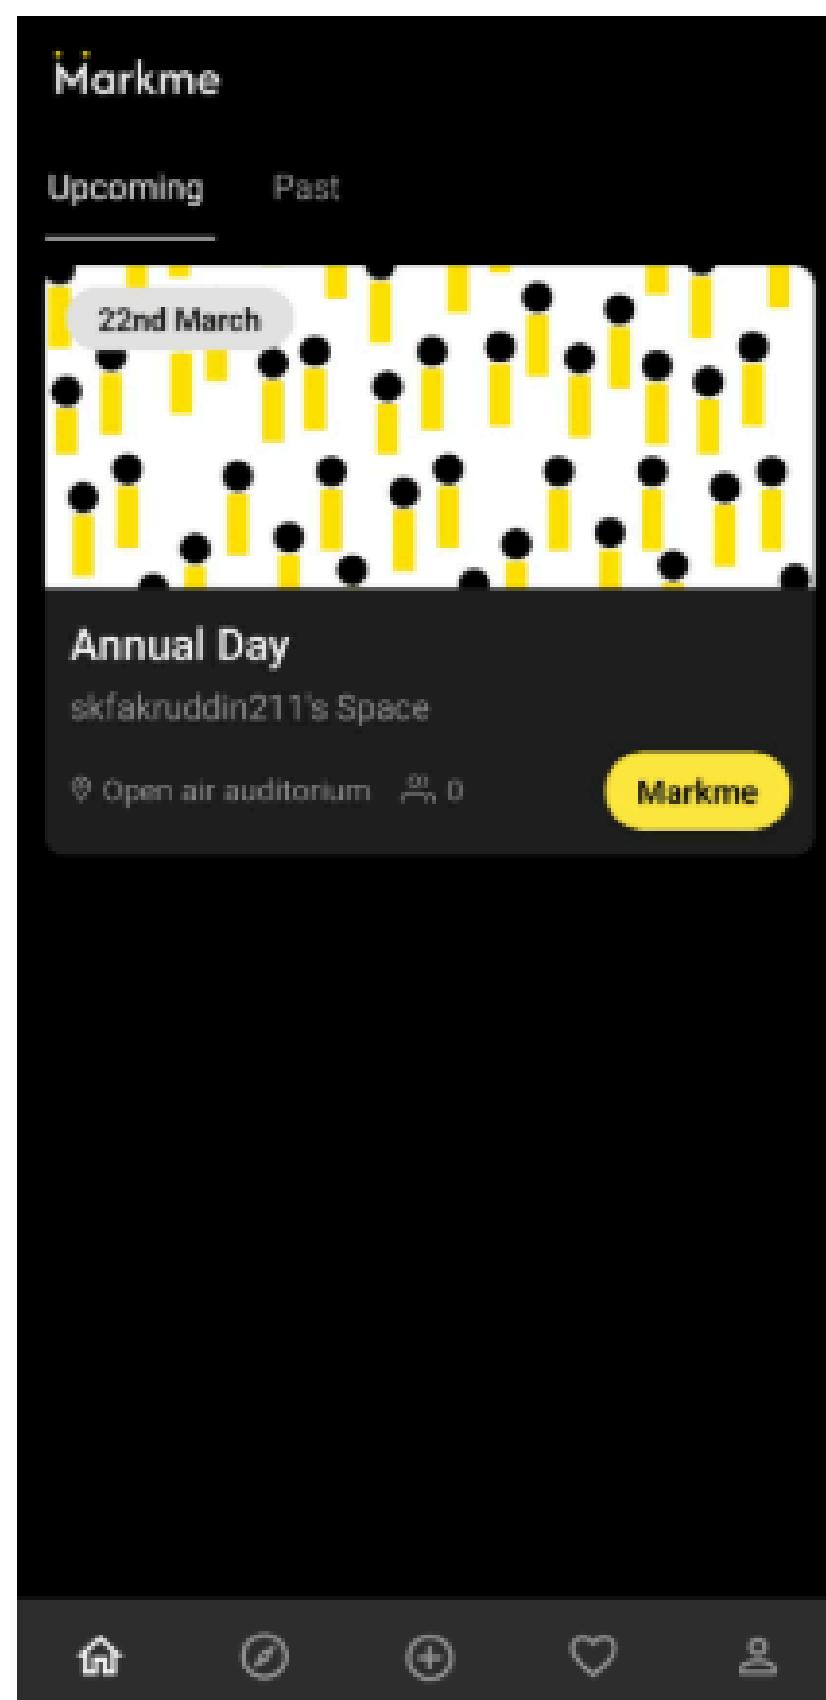

It offers a structured system where organizers can create and manage Spaces, host events, and track attendees using unique check-in codes. Events move through clear states like Upcoming, Live, On-Hold, and Archived to ensure transparency.

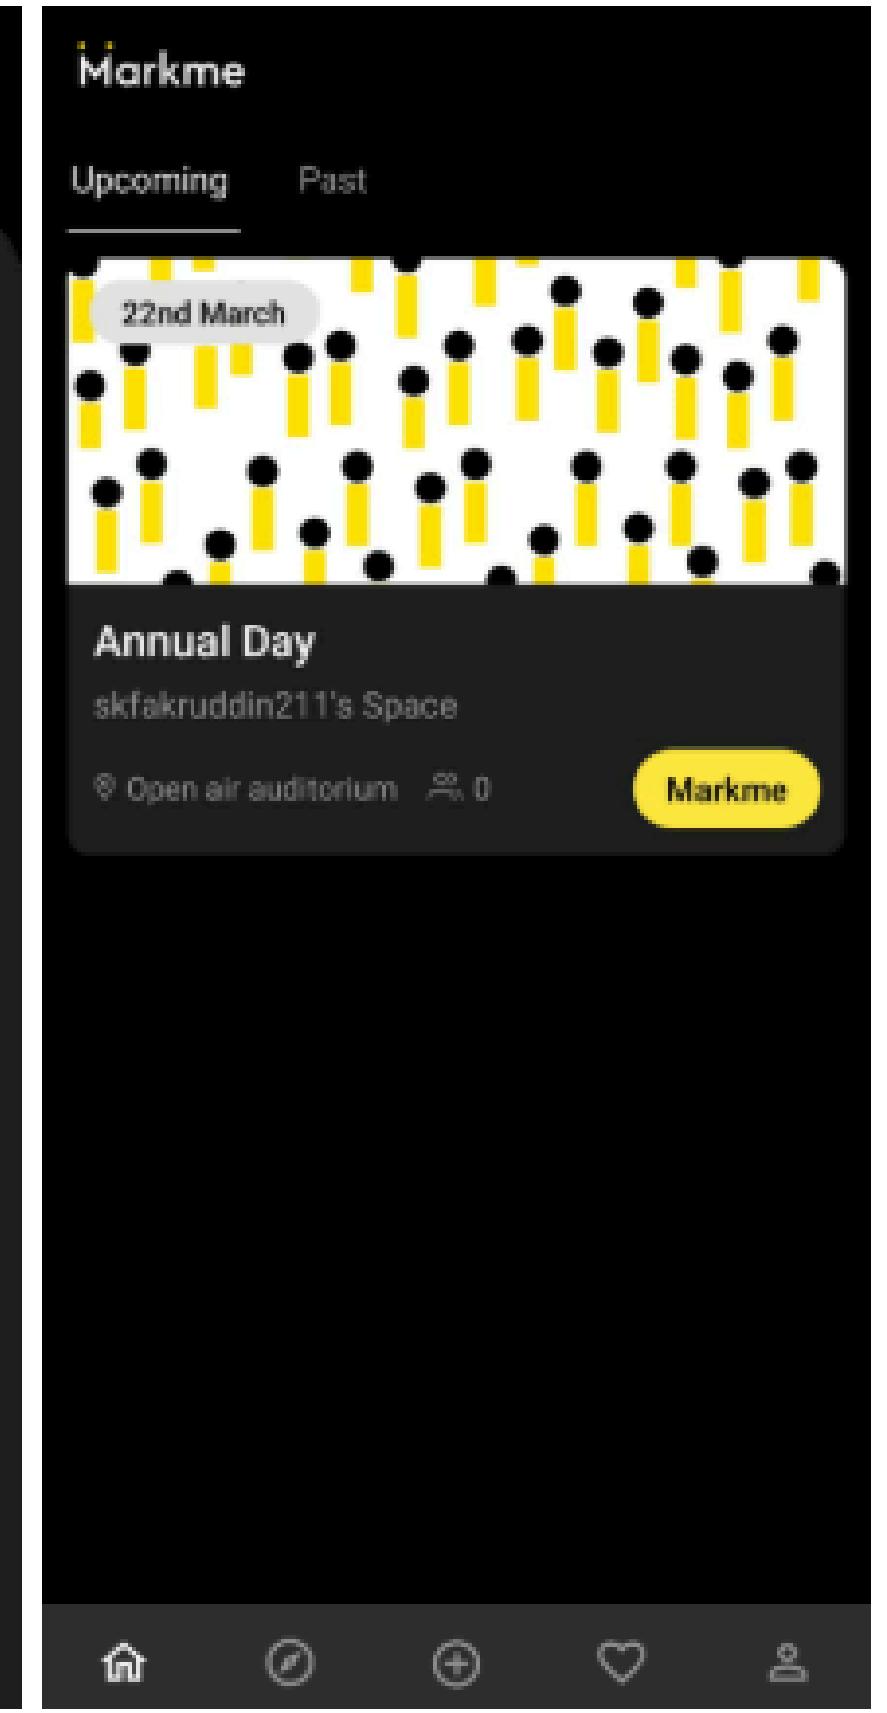

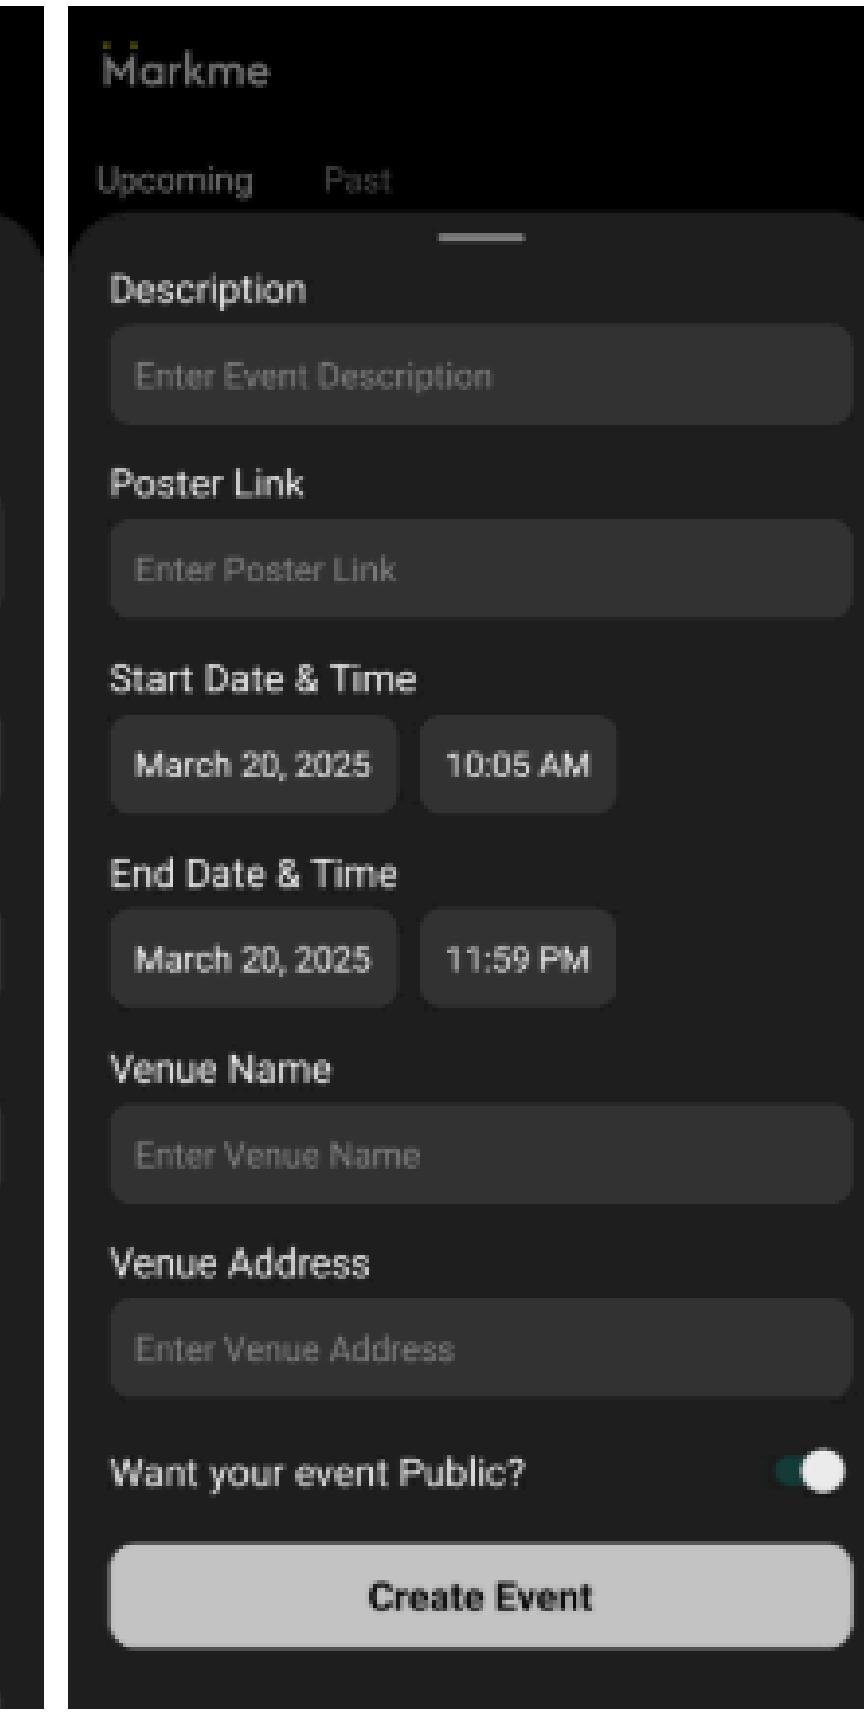

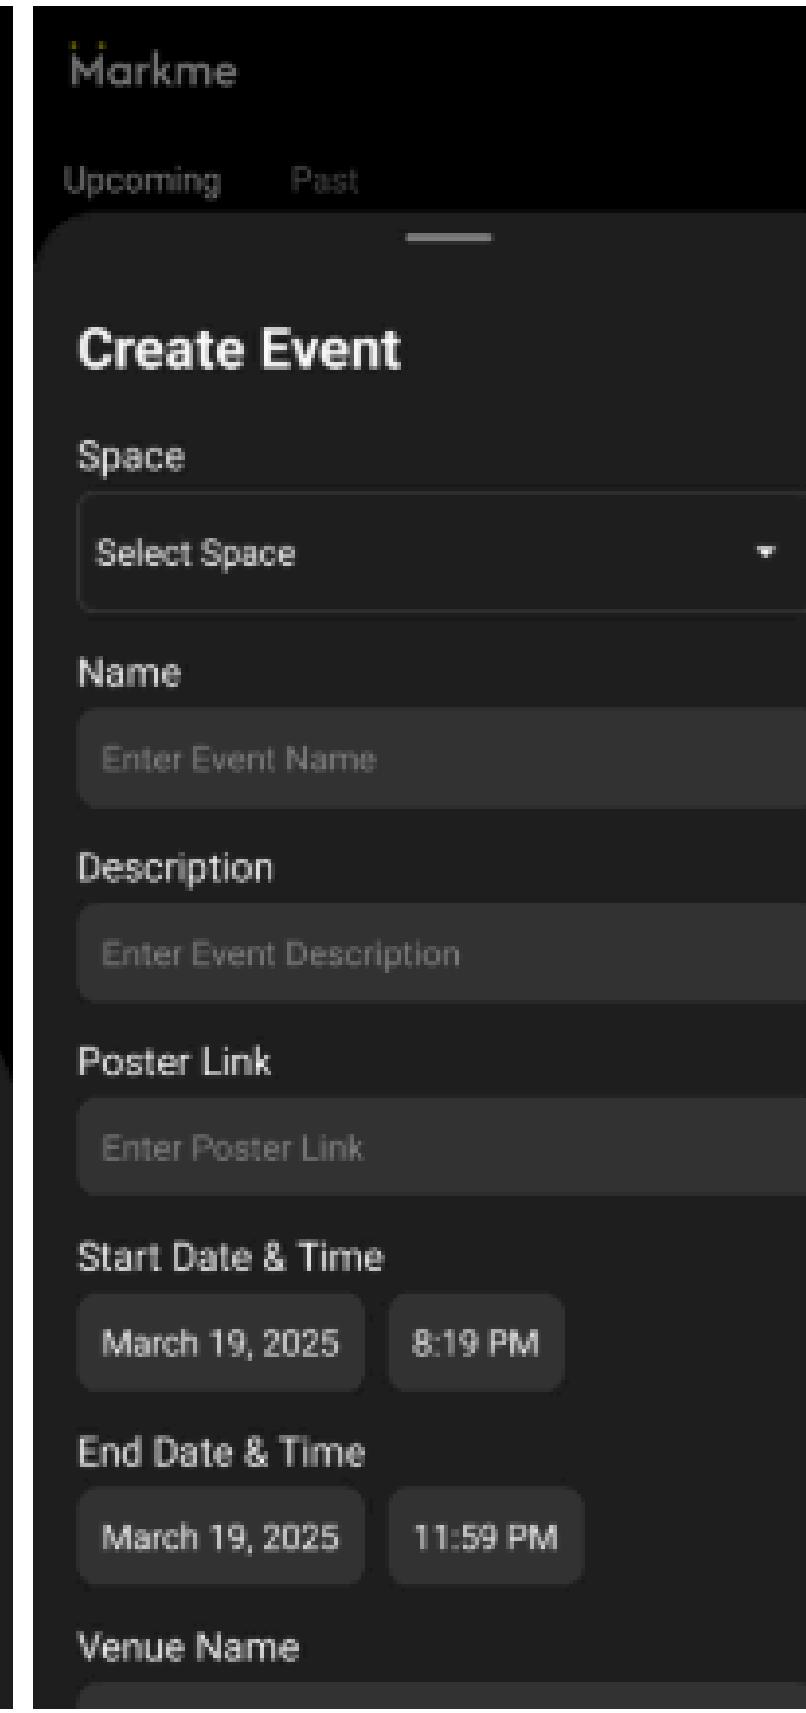

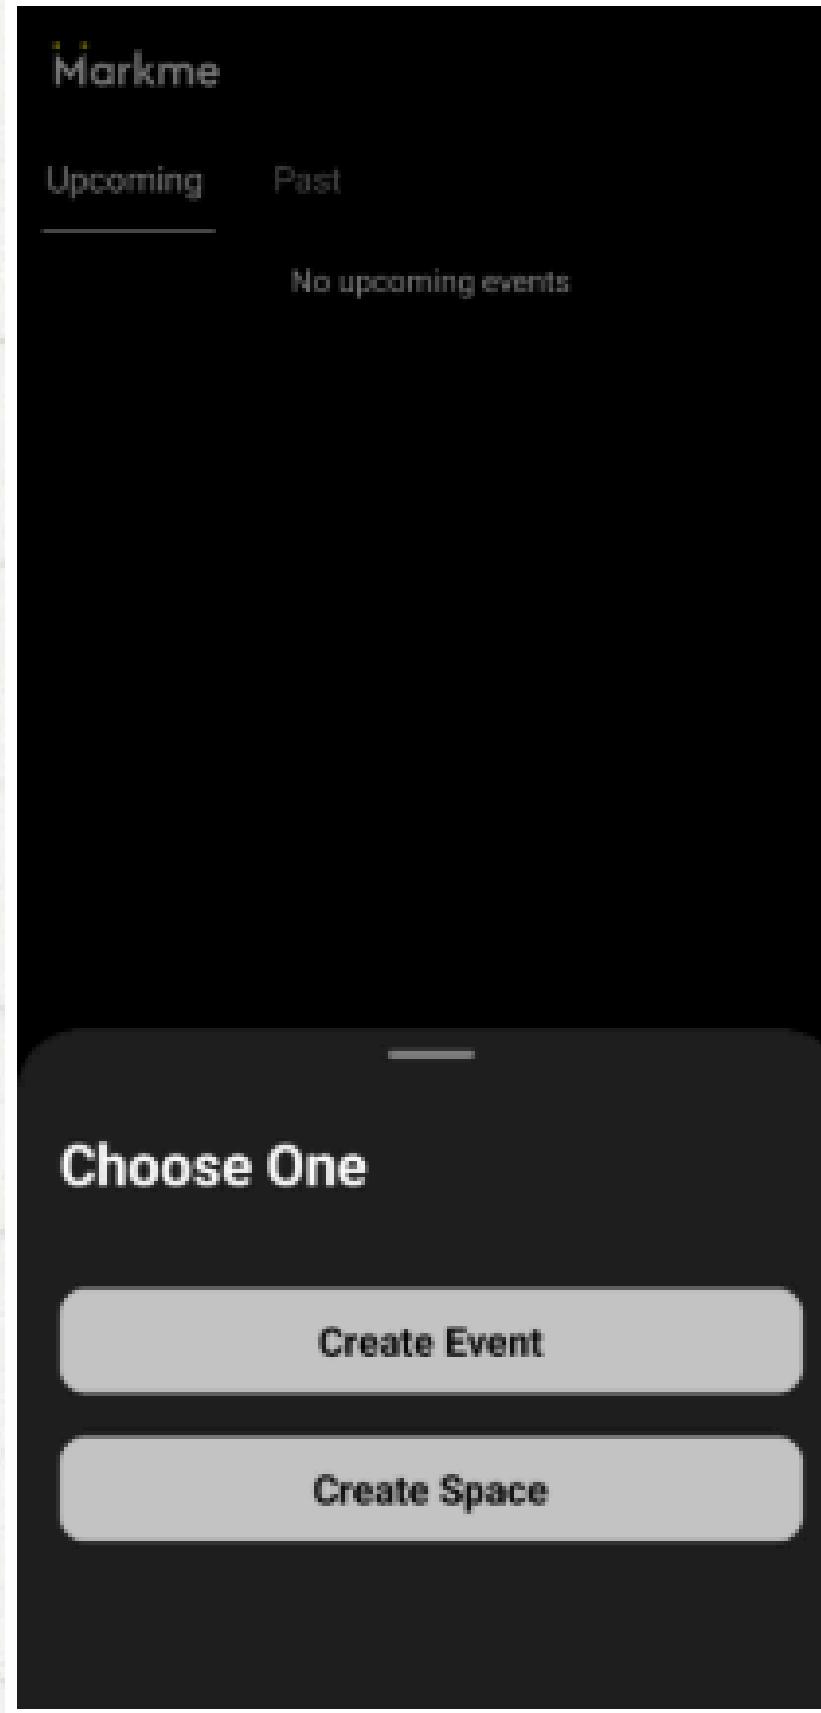

Admins can manage events, send notifications, and view insights through a dedicated dashboard, while students can register, check in, and track their event history from their profile.

With real-time updates, role-based access, and a user-friendly design, MarkMe enhances event coordination, improves accessibility, and boosts engagement within campus communities.
